## WOODLAND wildlife

Knowing what birds and insects we have in our woodlands can help us build the right habitat. Let us know what you spot!

Robin

Blackbird

Blue Tit

Great Tit

Tree Creeper

Sparrow

Brimstone Butterfly

Speckled Wood Butterfly

## WOODLAND trees

Can you find the trees with these leaves?

Beech

Holly

Oak

Rowan

Hazel

Lesser Celandine

Bluebells

Wood Anemone

## NEW FOREST guided walks

We have created three different New Forest walks all starting from the Woodland Centre at Hoburne Bashley\*.

### Wilverly Inclosure

Approx 2 miles. Duration 2 hours (approx)

### Hinchlesea Woods

Approx 2-3 miles. Duration 2-3 hours (approx)

### Holm Hill

Approx 5 miles. Duration 5-6 hours (approx)

You will learn about:

- › Flora and fauna
- › Agisters, the Keepers role in the forest
- › Organisations that manage the New Forest
- › The history of the forest, its myths, legends and folklore
- › The working forest
- › Its wildlife and commoning stock
- › Code of conduct when visiting the forest
- › Respecting the New Forest heritage and its nature
- › Tree folklore and ID

\*These walks are chargeable

A fascinating insight into wildlife that recycles

## F Ancient semi natural woodland

Discover the beauty of an ancient woodland

## G Pines and needles

Meet the UK's only truly native pine tree

# TREE spirit trail

The tree spirit is said to be the lord of the forest and of all natural things. Seeing one is said to bring you good luck, health, happiness and fortune.

Most sightings are by children and adults who are pure of heart. Will you be lucky enough to see one today?

Follow the tree spirit trail and take selfies of yourself with all ten tree spirits long the route. Once complete please pop to reception to claim your tree spirit tracker prize.
